The screenshot shows the Visual Studio Code interface. The Explorer sidebar on the left shows a project named 'EUROZOOM' with a 'templates' folder containing various HTML files. The main editor area displays the code for 'app.py', which includes imports for Flask, Selenium, threading, time, webbrowser, mysql.connector, uuid, and os. A try block contains an import for pyautogui and a check for PYAUTO_AVAILABLE. An exception handler prints an error message if pyautogui fails to load. The bottom panel shows the TERMINAL window with a PowerShell prompt where the command 'python app.py' is entered and highlighted with a red circle. A red arrow points from this circle to a text box.
